**PERFORMANCE SYSTEMS  
DEVELOPMENT**

# Optimizing Savings

Joy Knapp & Robert Shearer

Performance Systems Development

July 10, 2012

- ▶ Lighting & Appliance Choices
- ▶ Attention to Detail
- ▶ Modeling Accuracy
- ▶ Quality Assurance

# Presentation Goals

- Installation of ENERGY STAR Appliances and Efficient Lighting.
- Accurate modeling considerations.
- Ways to maximize savings and increase builder incentives.

## ENERGY STAR New Homes Version 3 Implementation Schedule

Permit Date <sup>2</sup>	Date of Final Inspection <sup>1</sup>		
	4/1/2011	1/1/2012	7/1/2012
Before 4/1/2011 <sup>3, 4</sup>	v2	v2.5	v3
Between 4/1/2011 and 12/31/2011 <sup>4</sup>		v2.5	v3
On or after 1/1/2012 <sup>5</sup>		v3	

<b>Version 2</b>	Version 2: 2006 Guidelines
<b>Version 2.5</b>	Version 2.5: Core Version 3 energy efficiency measures with Air Barriers and Air Sealing sections of Thermal Enclosure System Rater Checklist; Other checklists completed but not enforced
<b>Version 3</b>	Version 3: Core Version 3 energy efficiency measures with all checklists completed and enforced

## Under the Prescriptive Path only:

### ▶ Lighting & Appliances

- *Where refrigerators, dishwashers, ceiling fans, or exhaust fans are installed, products shall be ENERGY STAR qualified.*
- *ENERGY STAR qualified CFLs, LEDs, or pin-based lighting in 80% of fixtures in RESNET-defined Qualifying Light Fixture Locations, shall be installed.*

# L&A Packages

## Benefits of Energy Efficient Lighting & Appliance Packages:

- ▶ ENERGY STAR brand is recognized by homebuyers.
- ▶ “New and Improved” CFL products.
  - *Dimmable Bulbs*
  - *3 Way Bulbs*
  - *Fancy Fixtures*
  - *CFLs disguised as incandescent – aesthetically pleasing*

# ENERGY STAR Appliances

*The Home Should be Getting Credit For...*

- ▶ Refrigerators (kWh/yr)
- ▶ Dishwashers (Energy Factor or EF)
- ▶ Ceiling Fan (CFM/Watt)
- ▶ Exhaust / Ventilation Fans (Watts)

# CFL and FL Lighting

*The Home Should be Getting Credit For...*

- Interior Fixtures
  - *CFL (%)*
  - *Pin-Based FL (%)*
- Exterior Fixtures (%)
- Garage Fixtures (%)

# Much Maligned CFLs

Common complaints: “CFLs...”

- ▶ ....are “ugly”.
- ▶ ...bad light color.
- ▶ ...are slow to start.
- ▶ ...don’t last as long as claimed.
- ▶ ...contain Mercury.

For more information on all sources of mercury, visit <http://www.epa.gov/mercury>

For more information about compact fluorescent bulbs, visit <http://www.energystar.gov/cfls>

# You've Come A Long Way, Baby

## LIGHT OUTPUT EQUIVALENCY

To determine which ENERGY STAR qualified light bulbs will provide the same amount of light as your current incandescent light bulbs, consult the following chart:

INCANDESCENT LIGHT BULBS	MINIMUM LIGHT OUTPUT	COMMON ENERGY STAR QUALIFIED LIGHT BULBS
WATTS	LUMENS	WATTS
40	450	9-13
60	800	13-15
75	1,100	18-25
100	1,600	23-30
150	2,600	30-52

# What About Mercury?

Yes, CFLs contain Mercury...but

- ▶ CFLs contain an average of 4 mg. Old Mercury thermometers contained 500 mg!
- ▶ Using a CFL reduces the amount of mercury in the environment by reducing mercury emissions from power plants.

For more information on all sources of mercury, visit <http://www.epa.gov/mercury>

For more information about compact fluorescent bulbs, visit <http://www.energystar.gov/cfls>

# QA: On-Site Inspection Stage

## New Homes Onsite inspection Process

1. Exterior
  - Orientation
  - Elevations
  - Measure footprint
  - Outdoor temperature
2. Interior
  - Attic insulation
  - Wall insulation
  - **Room by Room lighting count**
  - **Appliances**
  - Document Htg/Clg/DWH
  - Infiltration
  - Duct testing
3. Re-enable appliances
4. Double check all items on the inspection checklist

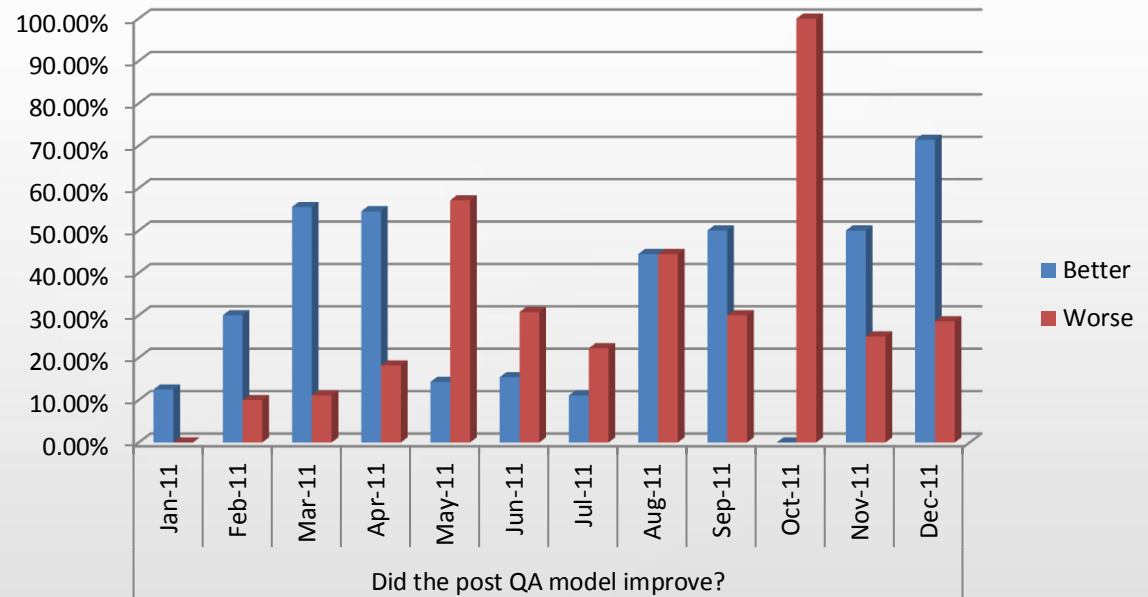

## Results

### On-Site QA Observations

## Results

*7 of 12 month resulted  
in post QA models  
generated more savings*

**Accurate modeling = Increased savings predictions**  
*Accurate modeling = increased builder incentives*

# Modeling Considerations

# Modeling Consideration: Maximizing Builder Incentives

*Modeling considerations that increase builder incentives*

- **Lighting**
- **Appliances**
- *Mechanical Equipment*
- *Mechanical Ventilation*
- *Stories Above Grade*
- *Windows*

# An Accurate Lighting Count Counts!!

- 5093 sf house, 44,027 cu ft volume.
- 0% CFL=11,706 kWh=\$1570.60 in incentives, \$3134 AEC.
- 100% CFL=14,448 kWh=\$1844.80 in incentives, \$2844 AEC.
- Additional \$274.20 in incentives, \$290 AEC Savings.

## kWh Savings

# Lighting

- Often CFL % findings onsite are higher than modeled
  - *Account for all efficient lighting to maximize kWh savings*
  - *Model LEDs as CFL lighting*

# Modeling Lighting Accurately

## Real Program Submittal:

- Rater defined 60% pin-based CFL
- Interior fixtures:
  - *CFL (%) 0.0*
  - *Pin-Based FL (%) 60.0*
- Exterior Fixtures (%) 0.0
- Garage Fixtures (%) 0.0

The screenshot shows a software interface with two tabs: "Rating" and "Audit". The "Rating" tab is active. The interface is divided into several sections for different building systems:

- Refrigerator:** Total Consumption: 459 kWh/yr, Location: Conditioned.
- Dishwasher:** Energy Factor: 0.83, or kWh/yr: 0, Place Setting Capacity: 12.
- Range/Oven:** Fuel: Natural gas, Induction Range: , Convection Oven: .
- Clothes Washer and Dryer:** Location: Conditioned, Washer Presets: RESNET Default, Washer MEF: 0.817, Elec Rate: 0.0803, Dryer Fuel: Natural gas, Washer LER: 704 kWh/yr, Gas Rate: 0.58, Dryer Eff. Factor: 2.67, Capacity Cu.Ft.: 2.847, Annual Gas Cost: 23.00, Moisture Sensing: .
- Lighting:** CFL (%): 0.0, Interior Fixtures, Pin-Based FL (%): 60.0, Exterior Fixtures(%): 0.0, Garage Fixtures(%): 0.0.
- Ceiling Fan(s):** CFM / Watt: 0.0 (at Med. speed), Restore RESNET Defaults.

At the bottom of the interface, there are two hand icons pointing to the left and right, likely for navigation.

# Modeling Lighting Accurately

## Actual QA Findings:

- 137 Photos Taken
  - *67 Interior fixtures:*
    - 21 CFL (31%)
    - 41 pin-based (61%)
  - *19 Ext. lights (100%)*
  - *7 Garage lights (100%)*
- 93 total lights
  - *Only 5 incandescent (7% of Int. Lighting)*

The screenshot displays the 'Rating' and 'Audit' tabs of a software interface. The data is organized into several sections:

- Refrigerator:** Total Consumption: 459 kWh/yr, Location: Conditioned.
- Dishwasher:** Energy Factor: 0.83, or kWh/yr: 0, Place Setting Capacity: 12.
- Range/Oven:** Fuel: Natural gas, Induction Range: , Convection Oven: .
- Clothes Washer and Dryer:** Location: Conditioned, Washer Presets: RESNET Default, Washer MEF: 0.817, Elec Rate: 0.0803, Washer LER: 704 kWh/yr, Gas Rate: 0.58, Capacity Cu.Ft.: 2.874, Annual Gas Cost: 23.00, Dryer Eff. Factor: 2.67, Moisture Sensing: .
- Lighting:** CFL (%): 31.0, Interior Fixtures, Pin-Based FL (%): 61.0, Exterior Fixtures(%): 100.0, Garage Fixtures(%): 100.0.
- Ceiling Fan(s):** CFM / Watt: 0.0 (at Med. speed), Restore RESNET Defaults button.

At the bottom of the window, there are two hand icons pointing to the right.

## ▶ Interior Fixtures CFL (%)

- The ratio, expressed as a percentage, of (compact fluorescent lights in *Qualifying Interior Light Fixtures*) to (all light fixtures in *Qualifying Interior Light Fixture Locations*).
- This is really focused on any [Edison-base \(screw-in\) lamps](#), whether LED or Fluorescent.

## ▶ Pin-Based FL (%)

- The ratio, expressed as a percentage, of ([pin-based fluorescent lights](#) in *Qualifying Interior Light Fixtures*) to (all light fixtures in *Qualifying Interior Light Fixture Locations*).

## ▶ Exterior Fixtures (%)

- The ratio, expressed as a percentage, of (lights in *Qualifying Exterior Light Fixtures*) to (all light fixtures in *Qualifying Exterior Light Fixture Locations*).
- In other words, this value could be as high as 100%.

## ▶ Garage Fixtures (%)

- The ratio, expressed as a percentage, of (lights in *Qualifying Exterior Light Fixtures*) to (all light fixtures in *Qualifying Exterior Light Fixture Locations*).
- In other words, this value could be as high as 100%

# Modeling Appliances

## Take Pictures

- *Eliminates model number errors*
- *Easy to save and file - Convenience*

# QA Review: Appliances

## Model using REM defaults Appliances

Refrigerator – 691 kWh

Dishwasher – 0.46 Ef

## Model using ES Appliances

Refrigerator – 425 kWh

Dishwasher – 0.70 Ef

**This home is predicted to save 1509 kWh over a standard new home.**

Annual End-Use Consumption	Reference	As Designed	Diff
Heating (CCF)	788	388	419
Heating (kWh)	823	292	531
Cooling (kWh)	1698	803	894
Water Heating (CCF)	241	227	14
Lights & Appliances (CCF)	71	71	
Lights & Appliances (kWh)	7032	6948	84

**This home is predicted to save 1834 kWh over a standard new home.**

Annual End-Use Consumption	Reference	As Designed	Diff
Heating (CCF)	788	372	414
Heating (kWh)	823	292	531
Cooling (kWh)	1698	782	915
Water Heating (CCF)	241	221	20
Lights & Appliances (CCF)	71	71	
Lights & Appliances (kWh)	7032	6644	388

**325 increase** in kWh savings. Savings are not just in Lights & Appliances!

# Energy Factor & kWh/yr

*EF -- This is the standard method of evaluating dishwashers; it combines the electrical energy and the water heating energy. Units are cycles/kWh.*

*kWh/yr -- On modern EnergyGuide labels, this combines the electrical and water heating energy, and is the new measure of dishwasher energy consumption*

## Dishwashers Qualified Product List

List Posted on April 04, 2012

Below are currently qualified ENERGY STAR models available for sale in the U.S.

Product Brand Name	Product Model Number	Size	Annual Energy Use (kWh/year)	Federal Standard (kWh/year)	% Better than Federal Standard (kWh/year)	Water Use (Gallons/Cycle)	Energy Factor (EF)	Date Qualified
Amana	ADB1400PY**	Standard	288	355	19%	3.41	0.76	9/30/2011
Asko	D5424	Standard	276	355	22%	3.87	0.78	1/27/2012
Asko	D5434	Standard	231	355	35%	3.87	0.93	1/27/2012
Asko	D5524	Standard	276	355	22%	3.87	0.78	1/27/2012
Asko	D5534	Standard	231	355	35%	3.87	0.93	1/27/2012
Asko	D5554	Standard	206	355	42%	4.12	1.05	1/27/2012
Asko	D5624	Standard	276	355	22%	3.87	0.78	1/27/2012
Asko	D5634	Standard	231	355	35%	3.87	0.93	1/27/2012
Asko	D5654	Standard	206	355	42%	4.12	1.05	1/27/2012
Asko	D5894A	Standard	171	355	52%	4.10	1.26	12/12/2011
Asko	D5954	Standard	276	355	22%	3.87	0.78	1/27/2012

# PA & OH Program Reminder

## Download and Print!

- Builder Signage is Available!
- Post in your model and spec homes!
- Versions available for PA and OH Utilities.

## New Builder Signage!

### ▶ Energy Efficient Products

This home is equipped with ENERGY STAR® qualified products to reduce energy use.

ENERGY STAR®, a U.S. Environmental Protection Agency program, helps us all save money and protect our environment through energy efficient products and practices. For more information, visit [www.energystar.gov](http://www.energystar.gov)
